

Our Vision: Pacific Region communities living sustainably within the natural limitations of healthy ecosystems supporting abundant and biologically diverse Pacific salmonids.

Our Mission: SEHAB C.A.R.E.S. SEHAB is the voice of the volunteer community dedicated to:
Communicating
Advocating
Representing
Educating, and
Supporting its endeavours.

SEHAB and the community have a shared commitment of ensuring functioning ecosystems supporting viable, genetically diverse and abundant indigenous fish populations.

Our partner, Fisheries and Oceans Canada (DFO)

DFO Vision: Excellence in service to Canadians to ensure the sustainable development and safe use of Canadian waters.

DFO Mission: It is our mission, as DFO employees, to deliver to Canadians the following outcomes:

- Safe and Accessible Waterways;
- Healthy and Productive Aquatic Ecosystems; and
- Sustainable Fisheries and Aquaculture.

In working toward these outcomes, the Department will be guided by the principles of sound scientific knowledge and effective management.

DFO Mandate, on behalf of the Government of Canada, DFO is responsible for developing and implementing policies and programs in support of Canada's scientific, ecological, social and economic interests in oceans and fresh waters.

Salmonid Enhancement Program:

The Salmonid Enhancement Program (SEP) plays a key role in DFO's work to conserve and manage Pacific salmon stocks. The program's activities aim to rebuild vulnerable salmon stocks, provide harvest opportunities, work with First Nations and coastal communities in economic development, and improve fish habitat to sustain salmon populations. SEP broke new ground when it was launched in 1977 by working closely with citizens and schools to raise awareness of salmon conservation and to carry out hands-on community salmon enhancement and stewardship projects. Three of the program's main activities are:

- [Fish Hatcheries](#)
- [Resource Restoration](#)
- [Stewardship and Education](#)

Roundtable

SEHAB Member: Wayne Salewski

Area: Upper Fraser

Community Advisor: Guy Scarf

Date: Sept 30 2014

Key Issues: Habitat

What top three points can you distill from community input to take to DFO RHQ?

- 1. Harvesting of Mountain Pine Beetle- no consideration for cause or consequence to streams or watershed**
- 2.Nechako River – no down stream water use management strategy**
- 3.DFO – lose of staff for habitat discussions/interaction/**

Stories:

A few examples of successes, failures, challenges.

Success:

NEWSS – Nechako stewardship society signing 1 Million dollar 5 year funding

UNBC – signing \$500,000.00 stewardship funding – sediment movement,climate change,human health relationship – integrated science –Nechako region

Challenges:

Understanding how salmon and sturgeon fit into the Nechako River with no down stream water use plan for the river and no DFO oversight or Provincial accountability.
